<i>Syllabus</i>	<i>vii</i>
<i>Chapter-heads</i>	<i>ix</i>

MODULE I : TECHNOLOGY IN BANK

CHAPTER 1

BANKING ENVIRONMENT AND TECHNOLOGY

◆ Introduction	3
◆ Evolution of Banking Technology over the years	4
◆ Core Banking	6
◆ Steps in the implementation of CBS	8
◆ Delivery Channels	10
◆ Core banking <i>vis-à-vis</i> standalone systems	11
◆ Conclusion	13

CHAPTER 2

OVERVIEW OF PROCESSING INFRASTRUCTURE

◆ IT Operation Processes	15
◆ Various Payment and Settlement Systems	20
◆ Electronic Clearing Service (ECS)	20
◆ National Electronic Clearing Scheme (NECS)	21
◆ Cheque Truncation System (CTS)	22
◆ RTGS (Real Time Gross Settlement)/NEFT (National Electronic Funds Transfer)	23

CONTENTS

	PAGE
◆ IMPS (Immediate Payment Service)	24
◆ Unified Payment Interface (UPI) by NPCI	25
◆ Process changes with Technology	28
◆ Conclusion	39

CHAPTER 3

ACCOUNTING INFORMATION SYSTEM

◆ Introduction	41
◆ Software architecture of a modern AIS	42
◆ Advantages and implications of AIS	43
◆ How to effectively implement AIS	44
◆ Conclusion	47

CHAPTER 4

INFORMATION ORGANIZATION AND MANAGEMENT

◆ Introduction	48
◆ Advantages	49
◆ The importance of management information system	49
◆ The information concept	50
◆ The information management concept	51
◆ The information systems concept	51
◆ Management Information Systems (MIS)	52
◆ Reporting requirement in banks	53
◆ CBS & MIS	54
◆ Difference between Data Warehouse & MIS	55
◆ Advantages of using data warehouse	56
◆ Transaction Processing <i>vis-a-vis</i> Analytical Processing	56
◆ Management functions and levels	56
◆ The nature of planning and decision making and the available techniques	57
◆ The importance of MIS to management	57
◆ Automated Data Flow (ADF) to the Regulator	58
◆ Conclusion	59

CHAPTER 5

RISK ASSOCIATED WITH TECHNOLOGY IN BANKING

◆ Introduction	60
◆ Risks Associated with Technology	61
◆ Board and Management Oversight	62
◆ Security Controls	63
◆ Legal and Reputational Risk Management	64
◆ Conclusion	68

CHAPTER 6

AUDIT FUNCTION AND TECHNOLOGY

◆ Introduction	69
◆ Conclusion	74

MODULE II : TECHNOLOGY – SYSTEM, DEVELOPMENT, PROCESS, IMPLEMENTATION

CHAPTER 7

HARDWARE ARCHITECTURE

◆ Introduction	77
◆ Types of Computer	77
◆ Personal Computer	78
◆ Components of a Computer	86
◆ Various features of the Central Processing Unit	88
◆ Conclusion	92

CHAPTER 8

SOFTWARE PLATFORMS

◆ Utility Programs	94
◆ Distributed Systems	95
◆ Advantages of distributed systems	95
◆ Database management systems	97
◆ Outline of the Chapter	97
◆ Learning goals	97
◆ Introduction	98
◆ Database Management System overview	98
◆ The various users of a database system	101
◆ File Management System (FMS)	101
◆ Drawbacks of file management system	102
◆ DBA (Database Administrator) and his responsibilities	107
◆ Responsibilities of Data Administrator (DA) and Database Administrator	108
◆ Operators in SQL	122

CHAPTER 9

SYSTEM DEVELOPMENT LIFE CYCLE

◆ Chapter Synopsis	124
◆ Systems Concept	124
◆ Need for systems analysis	125
◆ Phases of SDLC	127
◆ System Definition or Requirement Analysis	128
◆ System Design	129
◆ Program Construction or Coding	129
◆ Testing	130
◆ Implementation	131

◆ Maintenance	131
◆ Software Engineering Basics	132

CHAPTER 10

COMPUTER NETWORKS

◆ Types of Networks	135
◆ Basic Function of the OSI Models	156
◆ Advantages of the ISO, OSI Model	157
◆ Disadvantages of the ISO, OSI Model	158

MODULE III : COMMUNITY OF BUSINESS

CHAPTER 11

BUSINESS CONTINUITY & DISASTER RECOVERY PLANNING

◆ What is business continuity plan?	163
◆ What is Disaster recovery plan?	163
◆ What is the difference between BCP and DRP?	163
◆ Risk analysis of banking applications	164
◆ Types of processing systems	165
◆ Types of threats and disruptions	165
◆ Components of DRP	167
◆ Backup plan	168
◆ Test plan	173
◆ Insurance	175
◆ Practical aspects of DRP in Computerised Branches/ Control offices of Bank	175

CONTENTS

PAGE

MODULE IV : OVERVIEW OF LEGAL FRAME- WORK

CHAPTER 12

ONLINE TRANSACTIONS - CONCEPTS, EMER- GING TRENDS AND LEGAL IMPLICATIONS

◆ Chapter Synopsis	251
◆ Nature of Online Transactions	252
◆ Limitations of Traditional Money	252
◆ Electronic Money - What it means and its benefits	253
◆ Generic Features of E-Money Models	255
◆ Regulatory Framework in the Indian Scenario	256
◆ Electronic Payments Infrastructure in our Country and Emerging Trends	259
◆ Institutional Electronic Funds Transfers & Settlements	263
◆ Paperless Credit & SITPRO Model of Paperless Credit	268

MODULE V : SECURITY & CONTROL STAND- DARD IN BANKING

CHAPTER 13

SECURITY

◆ The Information Technology Revolution	271
◆ Need for Information Security	271
◆ Newer Threats to Business with use of IT	273
◆ Vulnerabilities of IS Systems	275
◆ IS Risk Management - Process	276
◆ Security Architecture - Elements of Computer Security	278
◆ Computer Security should support the Organization Mission	278

CONTENTS

	<i>PAGE</i>
◆ Computer Security is an Integral Element of Sound Management	280
◆ Computer Security should be Cost-Effective	281
◆ Computer Security Responsibilities and Accountability should be made explicit	282
◆ Systems owners have security responsibilities outside their own organizations	282
◆ Computer Security Requires a Comprehensive and Integrated Approach	283
◆ Computer Security should be Periodically Reassessed	284
◆ Computer Security is constrained by Societal Factors	284
◆ Computer Security Policy	285
◆ Policy, Standards, Guidelines and Procedures	286
◆ Key components of a Security Policy	287
◆ Monitoring Security	289
◆ Roles for Information Security in design, implementation and monitoring security	290

APPENDIX 1

OECD GUIDELINES FOR THE SECURITY OF INFORMATION SYSTEMS	292
--	-----

APPENDIX 2

GENERALLY-ACCEPTED SYSTEM SECURITY PRINCIPLES (GASSP) VERSION 2.0	321
--	-----

CHAPTER 14

CONTROL

◆ Need for Controls	353
◆ Application control framework	358

MODULE VI : SECURITIES POLICIES, PROCEDURE AND CONTROLS

CHAPTER 15

DEVELOPMENT AND REVIEW OF SECURITY POLICIES AND CONTROL STANDARDS

◆ Introduction	393
◆ Need for Information Security Policies	393
◆ Computer Security Policy	395
◆ Policy, Standards, Guidelines and Procedures	396
◆ Key components of a Security Policy	397
• Scope of the policy	397
• Accountability	397
• Compliance	398
◆ Monitoring Security	399
◆ Roles for Information Security in design, implementation and monitoring	399
◆ Conclusion	400

CHAPTER 16

COMPLIANCE AND INCIDENT HANDLING

◆ Introduction	401
◆ Application Control and Security	402
◆ Compliance	404
◆ Conclusion	408

CHAPTER 17

NETWORK SECURITY

◆ Introduction	409
◆ Factors for improvement of the security of networks	415
◆ Conclusion	416

MODULE VII : INFORMATION SECURITY AND IS AUDIT

CHAPTER 18

INFORMATION SECURITY

◆ Introduction	419
• Information Security	419
• What are Information Security Policies ?	420
• Difference Between Policy and Procedures & Guidelines	421
◆ Need for Information Security Policy and Guidelines	422
• Implementation of Information Security Policy and Procedures	424
• Information Systems Security Administration	425
◆ Information Security Policy Standards	430
• Introduction	430
• Scope	432
• Standards for Information Control	437
◆ Information Security Procedures and Guidelines	442
• User accounts and passwords	443
• Access Control	444
• Hardware acquisition	445
• Operating System Security	445
• Data Classification	448
• Incident Handling	449
• Change Management	456
• Virus Control Procedures	459
• Database Security	461
• Network Security	465
• Business continuity and Disaster recovery	476

CONTENTS

	<i>PAGE</i>
• Internet and e-mail	481
• Backup Restoration	487
CHAPTER 19	
IS AUDIT	
<hr/>	
◆ Introduction on IS Audit	489
• Introduction	489
• Audit Objectives	489
◆ Audit in Computerized Environment	491
• Understanding of Computerized Environment	491
• Accounting Information Systems in Computerized Environment	492
• Impact of IT on Economics of Auditing	493
• Concept of Security	494
• IS Management	494
• Availability of Information Systems	495
• Access Control	496
• Database Management	497
• Application Controls and their Functioning	497
• Evaluation of Business Risks	498
• Conversion Audit	499
◆ Audit Organization and Management	500
• Organization Strategy	500
• IS Audit as Review Management	507
◆ Risk Based Audit Framework	528
• Introduction to the Risk-Based Audit Framework	528
• Components of an RBAF	531
• RBAF/RMAF Integration	541
◆ IS Audit Standards	542
• Code of Professional Ethics	542
• IS Auditing Standards	543
• IS Auditing Guidelines	545

CONTENTS

	<i>PAGE</i>
◆ Use of Computer-Assisted Audit Techniques (CAATs)	546
• Background	546
• Planning	547
• Performance of Audit Work	550
• CAATs Documentation	551
• Reporting	552
ANNEXURE A	

INFORMATION TECHNOLOGY ACTS, STANDARDS & GUIDELINES	553
ANNEXURE B	

GLOSSARY	615
