1

INTRODUCTION

1.1	Customizing Your Desktop	2
1.1.1	Switch off Iteration (Disable Iterative Calculation)	2
1.1.2	Putting Developer Tab in the Ribbon	8
1.1.3	Customize Quick Access Toolbar	9
1.1.4	Change the User Name	12
1.1.5	Pinning the File	12
1.1.6	Saving the File	14
1.1.7	Creating Templates	15
1.2	Customizing a New File	17
1.2.1	Design the Workbook using the CRAP Principle of Robin Williams	17
1.2.1A	Leave the first column (row) blank	21
1.2.2	Leave one column blank between the headings and your workings	22
1.2.3	Leave one empty column at the end of the last working column, if you apply borders around it	22
1.2.4	Arranging the Sheets in a Logical Fashion	24

	PAGE
1.3 Some other Useful Tips	25
1.3.1 Use Keyboard Shortcuts	26
1.3.2 Keep all formulas simple	27
1.3.3 Enter each assumption only once	29
1.3.4 Do not hardcode any number inside a formula	29
1.3.5 Do it yourself	30
1.3.6 Spend more time in library	30
1.3.7 Format at the end	30

2

FUNCTIONS USED IN FINANCIAL MODELS

2.1 IF	35
2.2 NPV	43
2.3 IRR	47
2.4 PV	50
2.5 FV	53
2.6 PMT	54
2.7 Rate	55
2.8 NPER	56
2.9 XNPV	57
2.10 XIRR	58
2.11 MIRR	59
2.12 Price	61
2.13 ACCRINT	62
2.14 INDEX	63
2.15 MATCH	64
2.16 SUMIF	69
2.17 MOD	73
2.18 DATE	75
2.19 EOMONTH	76
2.20 EDATE	78
2.21 SUM	79
2.22 AVERAGE	82

	PAGE
2.23 SUBTOTAL	84
2.24 SUMPRODUCT	87
2.25 SUMIFS	89
2.26 ISERROR	90
2.27 IFERROR	91
2.28 TEXT	91
2.29 OFFSET	92
2.30 TRANSPOSE	95
2.31 SLOPE	96

3

KEYBOARD SHORTCUTS IN EXCEL

3.1 Basic Keyboard Shortcuts	100
3.2 Advanced Keyboard Shortcuts	104

4

WRITING CORRECT FORMULAS IN EXCEL

4.1 Write simple (and short) formulas	116
4.2 Understand Relative and Absolute Reference Very Well	120
4.3 Remember BODMAS while writing the formulas	124
4.4 Understand the nature of different Errors in Excel	126
4.5 Using Names in Formulas	134
4.6 Managing Circularity in formulas	140

5

USING CONTROLS IN EXCEL

5.1 Check Box	148
5.2 Scrollbar (Spinner)	150
5.3 Combo Box	153
5.4 Option Button	157
5.5 List Box	159
5.6 Importance of Linked Cell	160

6

CREATING USEFUL CHARTS IN FINANCE

6.1	Chart or a simple Data table?	164
6.2	Types of Charts in Excel	165
6.2.1	Column Chart	166
6.2.2	Line Chart	175
6.2.3	Pie Chart	182
6.2.4	Bar Chart	187
6.2.5	Area Chart	197
6.2.6	X-Y (Scatter Chart)	203
6.2.7	Stock Charts	207
6.2.8	Other Charts	211
6.3	Formatting a Chart	213
6.3.1	Managing the Chart Title	213
6.3.2	Managing the Legend	216
6.3.3	Managing the Vertical Axis	219
6.3.4	Managing the Horizontal Axis	221
6.3.5	Managing the Gridlines	225
6.3.6	Managing the Plot Area, Chart Area and the Data Series	225
6.4	Creating Creative Charts	230
6.4.1	Creating Chart without Using Excel's Chart Feature	230
6.4.2	Creating Lots of Small Charts	232
6.4.3	Creating Dynamic Charts	235
6.4.4	Creating In-cell Charts	237

7

UNDERSTANDING MACROS

7.1	Recording New Macros	243
7.2	Executing a Macro	246
7.3	Understanding the Visual Basic Environment	249
7.4	Writing Simple Codes	250
7.5	Conditional Statements in VBA	259
7.6	Managing Loops in VBA	263

	PAGE
7.7 Managing Circularity Using Macros	271
7.8 Some Other Useful Macros for Finance	274

8

FORMATTING NUMBERS

8.1 Theory of Number Formatting	282
8.2 Some Advanced Number Formatting Options	289
8.3 Keyboard shortcuts for Number Formats	295
8.4 Conditional Formatting	296
8.5 Some Confusing Number Formats	300

9

SENSITIVITY ANALYSIS IN EXCEL

9.1 Data Table	302
9.2 Scenario Manager	314
9.3 Building your own sensitivity model	317

10

MISCELLANEOUS TOPICS

10.1 Data Validation	319
10.2 Protecting Important Cells/File	328
10.3 Making Multiple Sheets Visible at the same time	332
10.4 Auditing a Model	334
