<i>Preface to Third Edition</i>	<i>I-5</i>
<i>Syllabus for B.Com. (Hons.)</i>	<i>I-7</i>
<i>Chapter-heads</i>	<i>I-9</i>

UNIT I **DEMAND, SUPPLY AND ELASTICITY**

1 **DEMAND AND SUPPLY**

1.1	Relationship between Demand, Need or Want	3
1.2	Demand Schedule	3
1.2-1	Individual demand schedule	3
1.2-2	Market demand schedule	5
1.3	Demand curve	5
1.3-1	Individual demand curve	6
1.3-2	Market demand curve	6
1.4	Factors affecting the demand (Determinants of the demand)	7
1.4-1	Relationship of demand with factors affecting demand	7
1.5	Law of Demand	9
1.6	Movement along the demand curve	11
1.7	Effect of Change in Factors other than price on the demand curve	12
1.7-1	Case I	12
1.7-2	Case II	13
1.7-3	Case III	14
1.8	Supply	15
1.9	Supply schedule	15
1.10	Supply curve	15
1.11	Determinants of Quantity Supplied	16
1.11-1	Relationship between Supply and the factors affecting supply	16

	PAGE
1.12 Law of supply : Relationship between supply and price	17
1.13 Movement along the Supply Curve	18
1.14 Effect of change in factors other than price on the supply curve	19
1.14-1 Effect of change in price of inputs	19
1.14-2 Effect of change in technology on the supply	20

2

BASIC FUNCTION OF MARKET : DETERMINATION OF PRICE

2.1 Introduction	21
2.2 Determination of Equilibrium price	21
2.3 Effect of shifts in demand and supply curve/predictions of demand and supply analysis	23
2.3-1 Assume initially there exists stable equilibrium	23
2.3-2 If from a stable equilibrium the market supply changes, what will be the effect of shift in supply curve	24

3

NUMERICALS ON DEMAND AND SUPPLY

◆ Numericals on demand and supply	26
-----------------------------------	----

4

ELASTICITY OF DEMAND AND SUPPLY

4.1 Introduction	42
4.2 Types of demand elasticities	42
4.3 Price elasticity of demand	42
4.4 Elasticity on a linear demand curve	43
4.5 Measuring elasticity on a linear and non-linear demand curve	44
4.5-1 Linear demand curve	44
4.6 Elasticity on a non-linear demand curve	45
4.7 Different ways of measuring elasticity	46
4.7-1 Total expenditure method	46
4.7-2 Point Method	48
4.7-3 Arc Method	48
4.8 Determinants of elasticity of demand/factors on which elasticity of demand depends	50
4.9 Income elasticity of demand	51

	PAGE
4.10 Types of Income elasticity	51
4.11 Cross Elasticity	52
4.11-1 Types of cross elasticity	52
4.12 Supply Elasticity	52
4.13 Type of elasticity	53
4.13-1 Case I	53
4.13-2 Case II	53
4.13-3 Case III	54
4.13-4 Case IV	54
4.13-5 Case V	55
4.13-6 Extreme Cases of Elasticity	55
4.14 Types of elasticity on supply (Interpreting supply elasticity) not in syllabus for understanding	56
4.15 Factors (determinants) of elasticity of supply	57

5

THEOREMS OF ELASTICITY

5.1 Introduction	59
5.2 If there are two parallel demand curves then what will be the elasticity at	59
5.2-1 I. At each price	59
5.2-2 II. At each quantity	60
5.3 If there are two demand curves with different slope then what will be the elasticity (i) At each quantity and (ii) At each price	61
5.3-1 I. At each price	61
5.3-2 II. At each quantity	62
5.4 Slope is a poor indicator of elasticity. Prove	62
5.5 If there are two demand curves with different slope intersecting at a common point what will be the elasticity?	63
5.6 Prove elasticity on a linear demand curve varies from zero to infinity	64
5.7 I. Straight line Supply curve passing through the origin has elasticity of supply equal to 1	66
5.8 II. Straight line supply curve passing through the X axis is inelastic i.e. $\eta_s < 1$	67
5.9 III. Straight line supply curve passing through the price axis has elasticity greater than one i.e. it is elastic	68
5.10 IV. Find the Price elasticity of 3 commodities A, B, C	69

5.11	Relationship between Total Revenue (TR), Marginal Revenue (MR) and Price elasticity (How is MR related to elasticity)	69
5.12	Straight line from the origin intersecting two parallel demand curves have equal elasticity	72
◆	Questions for review	73

6

NUMERICALS ON ELASTICITY

◆	Numericals on Elasticity	76
◆	Questions for review	86

UNIT II UTILITY

7

DEMAND ANALYSIS I : MARGINAL UTILITY

7.1	Introduction	93
7.2	Measurement of utility	93
7.3	Assumptions on which the cardinal utility theory is based	94
7.4	Consumer's equilibrium explained with the help of cardinal approach : Maximising utility	96
7.4-1	Consumer's equilibrium in case of single product	96
7.4-2	Consumer's equilibrium in case of several commodity	97
7.5	Derivation of demand curve with the help of utility theory (cardinal approach)	99
7.6	Limitation of Cardinal Utility Approach	100

8

DEMAND ANALYSIS II : ORDINAL UTILITY INDIFFERENCE CURVE

8.1	Introduction	102
8.2	Indifference Curve (IC)	102
8.3	Assumptions of ordinal utility approach (or Indifference curve)	103
8.4	Indifference Map	106
8.5	Properties (or characteristics) of Indifference Curve (IC)	107
8.5-1	Property I	107
8.5-2	Ind property	110

	PAGE
8.5-3	IIIrd Property <i>111</i>
8.5-4	Property IV <i>111</i>
8.5-5	Property V <i>111</i>
8.6	Different Possible Shapes of Indifference Curves <i>111</i>
8.6-1	I. When MRS between commodity X and Y is diminishing <i>112</i>
8.7	Exceptions <i>113</i>
8.7-1	In case of Perfect Substitutes <i>113</i>
8.7-2	In case of Perfect Complements : $MRS_{xy} = 0$ <i>114</i>
8.8	Different possible shapes of Indifference Curve Good, Bad and Neuter <i>115</i>
8.8-1	Good <i>116</i>
8.8-2	Bad <i>116</i>
8.8-3	Neutral <i>116</i>
8.8-4	When one commodity is Good and the other commodity is Bad <i>116</i>
8.8-5	When both commodities are Good <i>118</i>
8.8-6	When both commodities are Bad <i>119</i>
8.8-7	In case of Neutrals <i>119</i>

9

BUDGET LINE AND CONSUMER EQUILIBRIUM

9.1	Budget Line/Price Line <i>123</i>
9.2	Shifts in Budget Line <i>125</i>
9.2-1	Income of consumer changes <i>125</i>
9.2-2	II. Price of the commodity changes, with income of consumer remaining constant <i>126</i>
9.2-3	III. When both income and prices of both commodities changes in the same proportion <i>127</i>
9.3	Consumers equilibrium <i>128</i>
9.4	Composite Good Convention <i>132</i>
9.5	Corner solution <i>133</i>
9.5-1	I. Slope of Indifference curve is less than <i>134</i>
9.5-2	Case II <i>134</i>
9.5-3	Case III <i>135</i>

10

INCOME AND PRICE CONSUMPTION CURVE

10.1	Income Consumption Curve (ICC) <i>136</i>
------	---

	PAGE
10.1-1 When both goods (X, Y) are normal goods	137
10.1-2A When X is an Inferior Good	138
10.1-2B X is a superior good	138
10.2 Effect of change in income on the demand curve in case of normal goods	139
10.3 Effect of Change in Income on Demand Curve in case of Inferior Good	140
10.4 Price Consumption Curve (PCC)	142
10.4-1 If elasticity of demand (ed) $> 1 \rightarrow$ PCC will be negatively sloped	143
10.4-2 When price consumption Curve is zero sloped, that is horizontal or parallel to x-axis $ed = 1$	143
10.4-3 PCC will be positively sloped when $ed < 1$	144
10.5 Derivation of consumers demand curve	145
10.5-1 Slope of demand curve for normal good	146
10.5-2 Case II : Derivation of Demand curve in case of Giffen goods	147

11

ENGELS CURVE

11.1 Introduction	150
11.2 Derivation of Engel's Curve	150
11.3 Slope of Engels Curve	152
11.3-1 Two different types of Engels curve	152
11.3-2 In case of Luxury	153
11.4 Derivation of demand curve with the help of Engels curve	153

12

DECOMPOSITION OF PRICE EFFECT INTO INCOME AND SUBSTITUTION EFFECT

12.1 Introduction	155
12.2 In case of normal goods	156
12.3 Price Effect : In case of Inferior good and Giffen good	159
12.4 Is Giffen Good case of reality?	160
12.5 Shape of Indifference curve in case of different preferences	160
APPENDIX (FOR UNDERSTANDING) NOT IN SYLLABUS	161

13**APPLICATIONS AND NUMERICALS OF
INDIFFERENCE CURVE**

13.1	Excise Subsidy and Lump Sum Subsidy	162
13.2	Consumer Surplus	164
13.3	Application of Consumer Surplus	167

14**REVEALED PREFERENCE THEORY**

14.1	Introduction	170
14.2	Derivation of Law of Demand with the help of Revealed Preference Theory	171
14.3	Limitations of the theory	174
14.4	Contribution of Theory/Superiority over Indifference Curve	174
	QUESTIONS FOR REVIEW ON REVEALED PREFERENCE	174
	QUESTIONS FOR REVIEW	188
	UNIVERSITY QUESTIONS	189

UNIT III
PRODUCTION

15**PRODUCTION DECISIONS OF FIRMS IN SHORT RUN**

15.1	Introduction	195
15.2	Law of Diminishing Marginal Returns/Law of Variable Proportion/ Short run law of production/Production with one Variable Input	196
15.3	Stage of operation	198
15.4	Application of Law of Diminishing Marginal Returns	199
15.5	When does total product curve shift?	199
15.6	Relationship between slope of AP and MP	200
	QUESTIONS FOR REVIEW	207

16**ISOQUANTS**

16.1	Introduction (for Understanding)	208
-------------	----------------------------------	-----

17**ISOQUANTS/EQUAL PRODUCT CURVES**

17.1	Isoquants	211
17.2	Marginal Rate of Technical Substitution (MRTS)	212
17.2-1	Isoquant are convex to the origin	212
17.3	Two special cases	214
17.3-1	MRTS is constant; $es_{LK} = \infty$	214
17.3-2	MRTS is zero, $es_{LK} = 0$	215
17.4	Ridge lines or economic region	216
17.4-1	Exception	217
17.4-2	Significance of Ridge Lines	218

18**NUMERICALS ON ISOQUANTS**

◆	Numericals on Isoquants	219
---	-------------------------	-----

19**PRODUCTION DECISION OF FIRMS IN THE LONG RUN**

19.1	Introduction	230
19.2	Profit maximisation and cost minimisation (Least cost combination)	230
19.3	Long run equilibrium of the firm (Principle of substitution)	232
19.4	Equilibrium of firm in long run/Producer's Equilibrium/Choice of optimal combination of factors of production/Least cost combination of inputs	233
19.4-1	Minimising cost subject to output constraint	233
19.4-2	Case II	236
19.5	Expansion Path or Product Line	238
19.6	Isocline	239

20**LONG RUN LAW OF PRODUCTION**

20.1	Returns to Scale	241
20.1-1	Constant Returns to Scale (CRS)	241
20.1-2	Increasing returns to scale (IRS)	242
20.1-3	Decreasing returns to scale (DRS)	243

	PAGE
20.2 Comparison of Returns to Variable Factor (RTVF) of Diminishing Returns and Returns to Scale	244
20.2-1 Case I	245
20.2-2 Case II	246
20.2-3 Case III	246
20.3 Linear Homogeneous Production Function (HPF) or Linear Homogeneous of Degree One	248
20.4 Elasticity of Substitution	249
20.5 Difference between Diminishing Returns to a factor and diminishing Returns to scale	252
QUESTIONS FOR REVIEW ON PRODUCTION	252
UNIVERSITY QUESTIONS	253

UNIT IV

COST

21

SHORT RUN COST

21.1 Nature of short run cost curve	259
21.2 Total cost	259
21.3 Relationship between TC, TFC and TVC	260
21.4 Relation between AC, AVC, AFC and MC (How cost varies with output)	261
21.5 Shape of Cost Curves Relationship between different cost	264
21.6 Some Basic terminologies of cost	266
21.6-1 Economic Cost	266
21.6-2 Opportunity cost	266
21.6-3 Sunk cost	266
21.6-4 User Cost of Capital	267
21.6-5 Rental Rate of Capital	267
21.6-6 Accounting Cost	267

22

COST CURVES IN THE LONG RUN

22.1 Cost in the Long Run	269
22.1-1 I. Case I Minimising cost subject to output constraint	270
22.1-2 Case II	272

23**DERIVATION OF COST CURVES**

23.1	Difference between nature of short run and long run total cost	275
23.2	Derivation of LRAC/Planning Curve/Envelope Curve	276
23.2-1	Case I	276
23.2-2	Case II	277
23.3	Derivation of Long Run Marginal Cost (LMC)	279
23.4	Shape of Long Run Average Cost (LRAC) under different cost conditions	280
23.4-1	Increasing Return to Scale (IRS)	281
23.4-2	Decreasing Returns to Scale (DRS)	281
23.4-3	Constant Returns to Scale (CRS)	282
23.5	Relation between long run average cost and marginal cost	283
23.6	Economies and Diseconomies of Scale	286
23.7	Shape of LAC in case of CRS, IRS and DRS [Modern View]	287

24**LEARNING CURVE AND DERIVATION OF COST CURVES**

24.1	Introduction	288
24.2	Comparison Between Learning and Economies of Scale	289
NUMERICAL ON PRODUCTION AND COST		301
QUESTIONS FOR REVIEW ON COST		319

UNIT V**MARKET AND STABILITY ANALYSIS****25****MARKET AND PERFECT COMPETITION**

25.1	Introduction	325
25.2	Perfect competition	326
25.3	Demand Curve of Competitive Firm	326
25.4	Revenue curve of perfect competitive firm [For understanding]	328
25.5	Rules for all profit maximising firm	329
25.6	Profit maximising output level	330
25.6-1	TR, TC approach explained diagrammatically (Short run profit maximisation)	330

	PAGE
25.7 Some basic terminologies in profit	333
25.7-1 Accounting profit vs. Economic profit	333
25.7-2 Opportunity cost of land	334
25.7-3 Zero economic profit	334

26

PROFIT MAXIMISATION BY A COMPETITIVE FIRM (CHOOSING OUTPUT IN THE SHORT RUN)

26.1 MR, MC approach	335
26.2 Equilibrium of firm and industry or short run profitability of firm under perfect competition	337
26.2-1 Super Normal Profit (SNP) or Pure Economic Profit	338
26.2-2 Case II : Normal Profit (NP) $AR = AC$	338
26.2-3 Case III Losses	339
26.2-4 Super normal profit and losses	339
26.2-5 Case III	341

27

CHOOSING OUTPUT IN THE LONG RUN

27.1 Choosing output in the long run	342
27.1-1 Case I	343
27.1-2 Case II	343
27.2 Equilibrium of firm in the long run	344
QUESTIONS FOR REVIEW	346

28

SUPPLY CURVE AND PRODUCER SURPLUS UNDER PERFECT COMPETITION

28.1 Supply curves for a price-taking firm in short-run and long-run	348
28.2 How does firm respond to changes in input price	349
28.3 Short run supply curve of industry	350
28.4 Long run Industry Supply Curve	352
28.4-1 In case of Increasing cost industry (ICI) or decreasing return to scale (DRS)	352
28.4-2 In case of Decreasing Cost Industry (DCI) or Increasing Returns to Scale (IRS)	354
28.4-3 In case of Constant Cost Industry (CCI) or Constant Returns to Scale (CRS)	355

	PAGE
28.5 Elasticity of market supply	357
28.6 Long run elasticity of supply	358
28.7 Producers surplus in short run	359
28.7-1 Case I	359
28.7-2 Producer surplus versus Profit	360
28.7-3 Case II	360
28.7-4 Producer surplus in the long run	361
28.8 Effect of Government Policies on consumer and Producer surplus	362
28.9 Effect of output tax on Output	366
28.9-1 Effect of output tax on firm	366
28.9-2 Effect of output tax on the Industry	367
QUESTIONS FOR REVIEW	368

29

EFFECT OF TAX AND SUBSIDY

29.1 Effect of Specific Tax	369
29.1-1 Case I	370
29.1-2 Case II	371
29.2 Effect of Subsidy on output and Price	372
29.2-1 If demand is relatively inelastic and supply is relatively elastic	373
29.2-2 If demand is relatively elastic and supply is relatively inelastic	373
QUESTIONS FOR REVIEW	376

30

STABILITY ANALYSIS

30.1 Stable equilibrium	377
30.2 I. Stable Equilibrium	377
30.2-1 Walras Stability	378
30.2-2 Marshallian Stability	378
30.3 II. Unstable Equilibrium	378
30.3-1 Case I	379
30.3-2 Case II	380
30.3-3 Case III	381
30.3-4 Case IV	382
30.3-5 Case V	384
QUESTIONS FOR REVIEW	385
