

# Preface

*This book is essentially a primer on macroeconomics and sub-serves directly the academic need of students of Delhi University opting for a generic paper enlisted in Choice Based Credit System (CBCS) on Macroeconomics, viz. 'Introductory Macroeconomics'.*

*Very often in our teaching interactions with undergraduate students we had come across many students finding existing macroeconomics book as rather tough and distant. Language of most of books, our students felt, was somewhat complicated and contextualisation not easy to grasp. All this prompted us to understand their concerns more closely. In this backdrop we conceived this book to bring out the concept of macroeconomics in simple language. In the past two years while drafting this book we made sure that our students' questions and concerns in respect of concepts of macroeconomics are addressed comprehensively.*

*We have benefited tremendously in writing this book from suggestions of many other teachers in colleges of Delhi University. We also express our gratitude to our respective families who have been source of continuous inspiration and for their words that kept us going on this task. We thank our publisher TAXMANN who provided high level of professional inputs.*
